About This Game

What you get:

Sidescrolling. Base building. Tower defense. Army management. Survival. So many features in such a cute little package! Not convinced? Fine, have some more fancy words: Unlockable skins. Pixel art. Rabbits. Zombies. Skeletons. Other clichés.

There, did that do the trick? No? Fair enough. The whole "marketing your game" thing is not really my thing.

Future plans (from a dude that is bad at planning):

If this thing takes off, there are some features I'd like to add in the future. This is not a promise or a bribe, I promise. I personally want Xbox controller support, but people keep asking for WASD movement so you can play the game one-handed. What are you doing with that other hand, buddy?

Cheesy pun to end with:

May the fur be with you.
(Yeah, I'm not proud of that one.)

Super chill game with awesome pixel art and nice music. You don't get a lot of explanation or any tips, which I actually enjoy, because you have to figure out the strategy for yourself. Controls are nice and simple, so it's very easy to get into. Overall, I really like this game and I can definitely recommend it! :D. Hmm~Just a minimize "Kingdom", everything is very basic, like graphic, sound fx, background, AI, tasks etc, but I like game's music. At first impression, I see that map, I think "Wow~Against other kingdoms and conquest them? What a epic stuff." But in game...No like that, just complete task, and will conquest that place. Last, this game is easy to play, but no easy to win, strategy is very important in this game, and I finally passed the "Tutorial"...What the heck...5 dollars for minimize Dark Soul version Kingdom...But I recommend it, if you want to try. :)
